

ABOUT ONWARD METALS

ONWARD METAL CONCEPT was incorporated in 2008 with recognition No. 766062.

Our Head Office/Factory is located at KM 4 Ondo Road, Akure, Ondo State, Nigeria. We also have a manufactory at Km 8, Akure Road, Ikere-Ekiti, Ekiti state, Nigeria.

Onward Metal Concept is a product of a reorganisation of Onward Aluminium System Limited, Founded by Sir Isaac Omotosho of blessed memory. Onward Metal Concept is a household name in the south western part of Nigeria, as verified by various builders in and outside Akure, the Ondo state capital. We produce high quality, top grade metal roofing sheets that are strong, durable and long lasting. We are pioneers in the metal roofing sheets industry in Nigeria with a wide reach and acceptability among construction experts. Little wonder they say: "When others don't have it, try Onward Metals"

STEP TILES

Onward Metal Concept's Step Tile Roofing Sheets are spectacular replacements of the traditional roof tile. Formed with our cold roll forming machine from high quality colour coated coils, they offer a classic appearance that is a delight to behold and suitable for every building design.

This product is light weight, strong and lasts long and is easy to install.

STONE COATED

Our Metal Stone Coated Roofing offers the same premium looks, as well as eliminating maintenance costs, because metal does not burn. That is why we have become preferred alternatives in areas prohibiting natural Bond roofing sheets.

LONGSPAN

Long Span Corrugated Roofing Sheets are used to roof and beautify homes, offices, housing estates and commercial buildings. Moreover, they are also widely used as roofs or walls of factories, warehouses, cinemas etc because of its length hereby making it useful in buildings that need very wide area of roofing

ALUZINC

Aluzinc, a flat carbon steel sheet from from steel, sets the standard for dry and insulated roofing. This product combines attractive aesthetics with demonstrated durability. Aluzinc's natural spangled silver aspect lends an attractive aesthetical appearance to the steel sheet. And thanks to the thin, transparent layer of aluminium oxide on its top surface, the steel will continue to shine for a long period of time. Aluzinc's unique combination of aluminium and zinc has a demonstrated track for outstanding resistance to corrosion even in highly corrosive environments

“OUR CLIENTS & PARTNERS”

Our clients are spread across the length and breadth of the country
